

# MODEL SC-1

## Carrying Case

### Specifications:

- One soft case holds one H-809VII air sampler, 1-2 filter holders and 1-2 boxes of 4" filter paper.
- Material is made of 100% Denier Cordura™ Nylon and is unaffected by rot or mildew and is also abrasive resistant.
- Reflective tape stripe is both day and nighttime florescent.
- All exterior stitching is triple stitched to prevent unraveling.

## Designed Specifically for the USAF Air Sampling Kit

*Protect your gear while improving response time!*

Unlike the heavy and cumbersome Pelican Case, the **SC-1** Transport Case was specifically designed for use with the USAF Air Sampling Kit. The **SC-1** allows responders to store their air sampler attached to the TRP-2 Tripod, enabling them to vastly improve response time. There are also internal pockets for storage of the 2500-25A filter holder and 0750-49 filter paper.
