

Rapid Response® Xylazine Test Strip

Xylazine is a non-opioid tranquilizer used as a sedative, analgesic, and muscle relaxant used in veterinary medicine for animals including horse and cattle. Recently, it has commonly been encountered in the recreational drug supply, most commonly in opioid “dope” (e.g. fentanyl, heroin). Combining xylazine with other drugs that cause central nervous system depression compounds the sedative effects and can increase the risk of overdose and death.

The Rapid Response® Xylazine (XYL) Test Strip is an easy-to-use rapid lateral flow assay for the qualitative detection of xylazine in liquid or powder dope samples.

Kit Contents

- Individually packaged test strips
- Product insert
- Results interpretation card

Product Details

- Detects Xylazine in concentrations above 1000 ng/mL
- Results interpretation guide printed on each pouch
- Built-in procedural control
- Results in 5 minutes
- Compact format for easy distribution

Testing Procedure

For illustrative purposes only. Refer to product insert for more details.

Results Interpretation

Rapid Response® Xylazine Test Strips	
This card is not a replacement for the instructions for use. Please read the instructions prior to use and follow the directions carefully.	
Positive Contains Xylazine	
Negative Xylazine could not be detected	
Invalid
