### IdentiFINDER2 NGH (R400)

The best all-around handheld radiation detection and identification product you can find. With over 15,000 devices in the field, the identiFINDER R400 is the most trusted radio-isotope identification device (RIID) worldwide. This product is the ideal solution for all-purpose surveying, emergency response and environmental monitoring.

### RDS-30

The RDS-30 is a Digital Handheld Dose Rate Meter designed for a wide range of applications. Perfect for first responders, civil defense, industrial radiography, or as a radiation survey tool for oil & gas pipelines. Extreme ease of use and durability make the RDS-30 perfect for any general purpose radiation survey application.

### RDS-80

The RDS-80 Surface Radiation Contamination Meter is a versatile contamination detector designed for a wide range of applications in radiation protection. It can be used to easily screen surfaces, objects, and equipment for radioactive contamination. It has rugged construction and small size and light weight make it versatile enough to fit a wide range of applications.

### Mini rad-D

The *mini rad-D* is a rugged, all-weather radiation detector that's small enough to wear on a belt yet powerful enough to quickly locate low-level radioactive sources. Designed to discreetly monitor any environment easy to use. A single switch that puts it into audible alarm mode, vibrate alarm mode, or turns it off.

The first step in providing protection for risk and vulnerability is to be able to immediately detect and respond to any potential radiological threat. The Radiation Response Kit with idF2 allows for immediate detection, monitoring and identification of the potential threat. Since not all responding organizations face the same threat levels, or are responsible for the same degree of response, LAURUS Systems designs kits that address the specific needs of the end-user.

#### Kit includes:

- identiFINDER R400 NGH
- RDS-30 Dose Rate Meter
- RDS-80 Contamination Monitor
- Mini Rad-D PRD
- Check Sources
- Pelican protective case for all items above (1)
